Proletarians of All Countries, Unite!

We Are Supporters of the Theory of the Omnipotence of Revolutionary War!

New Democracy Association

Germany, April 2012

Our Position:

- Our center is combat.

- Our base is the proletariat and the people.

- Our road is the people's war.

- Our objective is the People's Republic of Peru.

- Our ideology is Marxism-Leninism-Maoism, Gonzalo Thought.

- Our final goal is the world proletarian revolution and communism.

- The axis of everything is the Communist Party of Peru, its leadership, and Chairman Gonzalo.

— Build the Seizure of Power in the Midst of People's War!, Central Committee of the Communist Party of Peru, 1991

We start by reaffirming our salute and full, conscious, unconditional, and voluntary subjection to Chairman Gonzalo, Great Leadership of the Party and the revolution, the greatest living Marxist-Leninist-Maoist on the face of the Earth, continuator of Marx, Lenin, and Chairman Mao Zedong, center of Party unification and guarantee of triumph until communism; to our all-powerful ideology, Marxism-Leninism-Maoism, Gonzalo Thought, principally Gonzalo Thought; to the Communist Party of Peru (PCP), to its leaders, cadres, and militants, who in the present circumstances persist in holding high the invincible banner of people's war, strictly subject to our party principles and very particularly to our leadership, crushing with people's war the plans of imperialism, reaction and revisionism, pledging communist heroism in abundance in the struggle for the general reorganization of the PCP; Thus, very especially our full and complete subjection to the First Congress of the Party, Marxist Congress, Marxist-Leninist-Maoist, Gonzalo Thought, principally Gonzalo Thought, which established our Basis of Party Unity (BPU) with its three instruments, the ideology, Marxism-Leninism-Maoism, Gonzalo Thought, principally Gonzalo Thought, the Program, and the General Political Line, with its center being the Military Line; as well as the Third Plenum, historical and transcendental, and Chairman Gonzalo's Speech of September 24th, 1992, which shines victorious and powerful before the world as a weapon of

combat, as well as the party plans and accords that correspond to its application. We salute the combatants of the People's Liberation Army (EPL) and the masses of the new Power who, despite all the genocide and revisionist betrayal, remain unwavering in their commitments to the Party and the revolution. We salute the Marxist-Leninist-Maoist Parties and organizations worldwide and the people's wars under their leadership. We salute the International Communist Movement, marking with fire all the attempts of Avakian and Prachanda's revisionism, which led to the de facto liquidation of the Revolutionary Internationalist Movement (RIM) with the desire to erase all that could be advanced with it. We mainly thank the efforts of Chairman Gonzalo and the PCP with people's war. We renew our commitment to defend our Great Leadership against all attacks, wherever they come from and to be part of the cost.

This reaffirmation is not and cannot be a mere salute to the flag, an empty formula, or a cliché. It must be a militant communist expression of struggle for the general reorganization of the Party, in a fight to the death against revisionism and the reactionary plan to destroy the general reorganization of the Party, to annihilate the people's war. Here, abroad, this commitment today has to be embodied in unmasking and crushing the sinister trafficking of the Party's name, its generated organizations, and means of agitation and propaganda, on the part of a counter-revolutionary element that fulfills the plan of imperialism, mainly Yankee imperialism, to a tee.

Many comrades at the international level are confused, they don't know how to orient themselves, they ask themselves: "who is who? there are so many factions… is there nothing?" This is not strange, because this is precisely what the imperialist plan is aiming at. The position of the communists has to take its starting point in a class position, in a principled position and in the light of our common universal ideology, Marxism-Leninism-Maoism, principally Maoism, to see the concrete facts of the class struggle, the struggle between armed revolution and counter-revolution in Peru. It is not a question of starting from good wishes, in some cases, or from petty interests in others, but to remember what Chairman Mao emphasized, the class character and the relation with practice, which our conception of the world has. First, position, and, starting from this, we see the practice. It is not enough to do one without the other–to do only the first is dogmatism, and to do only the other is Avakian pragmatism. You need both.

At present we are applying this fundamental method to clarify the situation and find out who is who. This is done by wielding the weapons of combat that Chairman Gonzalo and the Party have provided us with.

For Clarification

In order to be as clear as possible, to facilitate understanding, it must be clearly stated that "the multiple factions," that imperialism, reaction, and its revisionist lackeys always insist on, do not exist as such. What exists in Peru is:

- The second ROL, revisionist and capitulationist, of the hoax of the "peace accord," that is to say, MOVADEF with Julio (that is to say, the traitor of Huallaga who presents himself as Artemio). These rats have long been outside the Party, this line was structured outside of the Party.
- The third ROL, also of a revisionist and capitulationist character, is what the reaction presents as "the VRAE faction," headed by the rat José and his cronies. This line has been structured in the Party since the end of the 1990s.
- Committees, cells of various party levels, and in their environment, concentrically, units of the EPL and the organs of the new Power/Front, dispersed, acting so far without centralized national leadership, but still firmly subject to the Headquarters, our ideology–Marxism-Leninism-Maoism, Gonzalo Thought, principally Gonzalo Thought–and the BPU, who strive for the general reorganization of the Party in the midst of people's war.

This is the case, let there be no doubt about it.

The Central Committee for years has been blown up by the convergent action of the rat José and the rat Julio, in collusion with Peruvian reaction, in fulfillment of Yankee imperialism's plan. Therefore: what the counter-revolutionary element, which has usurped the *Red Sun [Sol Rojo]* magazine and its web page, affirms, is a pure lie. It is a story. It is a part of the enemy's disinformation campaign, it is a part of the psychological warfare (a fundamental and indispensable component of the "low-intensity warfare" led by Yankee imperialism). In the document published in October 2011–*For the General Reorganization of the Communist Party of Peru as a Part of the Development of the People's War to Seize Power Countrywide! Grasp Gonzalo Thought to Solve New Problems!*– we have pointed out the guidelines on how this process took place, that is to say, how it was possible for the Central Committee to be blown up. We think that it is not necessary to repeat everything that was exposed there in this document. We recommend that the document be studied again.

Assuming our commitment, here and concretely, to serve the general reorganization of the PCP, sparking the reorganization of the Peru People's Movement (MPP), the Party's generated organization for party work abroad, we disassociate, reject, condemn, and brand with fire the call to capitulation from the counter-revolutionary subject that usurps the name of the PCP, its Central Committee, the MPP, and the magazine *Red Sun* (RS), as we have denounced in our October 2011 document.

The subject in question has published, in the name of the "MPP," the mammoth piece of information: *Against Wind and Tide, the Glorious Communist Party of Peru Maintains the Course of the People's War!,* in March of this year, on the usurped web page "RS," where the reactionary position that he represents and defends is concentrated.

In this document, he expresses his role as the true spokesperson of the government of the fascist, genocidal, and sellout Ollanta Humala and calls for capitulation: in Peru,

to the leaders, militants, combatants, and masses that persist in the people's war, in the complex and difficult situation of the bend and inflection that the people's war, the Party, the Army, and the Front/new Power are going through; and, abroad, to those of us who work with the particular responsibility of fulfilling the tasks established by Chairman Gonzalo for the MPP: To serve to create public opinion favorable to the people's war in Peru, to contribute to the reconstitution of the Communist Parties and to serve the world revolution and, within this, to fulfill the tasks related to the RIM. Tasks that we fulfill by developing the two united and inseparable campaigns: the campaign for Maoism and the campaign for the defense of our Great Leadership, Chairman Gonzalo, and Gonzalo Thought. The latter is key, because the successful development of the campaign for Maoism and of our three tasks depends on its fulfillment.

In their filthy tome with full impudence, impudence and trying to deform the principles of the Party and the people's war established in the First Congress of our Party and endorsed by the experience of more than 31 years of invincible people's war, they say: *"…For the Party, the question is to continue to focus on mass work. Armed actions in this situation will continue to expand the scope of the axis of the people's war; it is still the main field, but not the jungle; and with the leadership in the field, to focus on mass work. Thus, the Party continues to assume its responsibility as the proletarian vanguard, leading the people's war, and as the red faction within the international communist movement. In this task, the Peru People's Movement firmly assumes its role of serving the ideological struggle against revisionism at world level…"* (our emphasis).

In this quote, which precedes it, is where the crux of the matter lies, of all this mammoth, as well as of the others, that they have been publishing profusely on the internet in fulfillment of their "ideological struggle" against the Peruvian revolution and the world revolution, trying to cover it up with their already known two-faced counter-revolutionary style, as a struggle "against revisionism on a world level." It is in this quote, in which his reactionary position and conception is summarized, which, sowing more confusion on all levels, pretends to present it as Marxist-Leninist-Maoist, Gonzalo Thought, while disarmed, sinisterly and with all his brazenness disfigures it to the point of turning it into counter-revolutionary poison to propagate capitulationism and revisionism, to serve the need of imperialism and reaction to annihilate the people's war, thus serving the bureaucratic road against the democratic road.

"RS Issue 37," Clear Proof of the Reactionary Plan

After this, he has published a fraudulent "RS Issue 37," in which all its content is marked by the counter-revolutionary position and conception that we are smashing into pieces here, as we will demonstrate by covering some essential issues addressed in it.

But, first, it is necessary to deal with the position assumed by these two-faced individuals, in view of the events that took place in the La Convención Valley in Peru, starting

on Monday, April 9th, when an armed action of the ROL led by the rat José took place, where, according to the reactionary press, it was reported:

> "These took over the facilities of the contractor companies of the Gas de Camisea project, located in the town of Kepashiato, district of Echarate, province of La Convención (Cusco). Taking hostage several workers of the companies TGP, Skanska and Construcciones Modulares." (Note that appeared in all the national newspapers, as it was information from the Ministry of the Interior).

After which, large military operations were carried out by the Peruvian Armed and Police Forces (FF.AA. and FF.PP.) under the military command of the Southern Command of the Yankee Army, under the name of *Operation Freedom*. Yankee intervention, which was revealed by the destruction, by the attackers, on the 12th, of "a PNP helicopter," as first reported by the authorities, which later turned out to be a Yankee DEA helicopter, the UH1H Huey II helicopter that crashed. In addition, Yankee military commanders have been entering the country since January, they say to "coordinate" *Operation New Horizons 2012,* which will take place from May to August this year.

Continuing with the press account of the events, on April 14th the newspapers reported that the armed group released the 36 workers.

> "The Shining Pathists demanded a ransom of 10 million dollars to release them. It was not yet clear if the companies paid any ransom, but experts said that it is possible that the captors and the companies reached agreements that led to the release in which the Armed Forces did not participate." (As reported by international press agencies and most of the country's newspapers).

In the military operations under Yankee command, massive bombing and raiding of the La Convención Valley and other valleys of the Apurímac and Ene rivers, which extend from the Cuzco department, in the South, to the limits of the Cerro de Pasco department, in the center, causing deaths, injuries and forced displacement of the peasant populations of this vast area of our country, which covers more than $300{,}000\text{km}^2$ of territory.

Faced with these facts, the reactionary government has called for "national unity" and condemned the "kidnapping of the workers" to hide the U.S. military intervention and the genocide against the people that they have been committing.

In light of the facts, we denounce Yankee imperialism's military intervention and the fascist, genocidal, and sellout Humala government. We denounce the fact that, the current military operation that they are conducting under the name of *Operation Freedom,* is not just any operation but one of great proportions, in which, under Yankee

command, combined forces from various parts of the country are participating, bombing, and raiding vast areas of territory and targeting the civilian population.

So, we are not facing yet another act of Yankee intervention in our country, nor is it simply a repressive decision to "establish the authority" of the new reactionary government; rather, Yankee imperialism is intervening militarily in application of what they understand as threats to their security, in the context of weak states, etc., as they are doing in Mexico, with the Mérida Initiative.[1] According to this concept of imperialism, this "demands the coordination of civilian and military actors," the integration of security and development practices, as Humala and his government have been proposing, that with these operations and genocide, their hesitations are over and they start to develop more openly a fascist, genocidal and sellout government, under the call for "National unity,: counting on the support of the FF.AA.

We denounce this new sinister genocide that is being committed against our peasant masses in order to subjugate them, to set a bloody precedent, and make them submit to the hegemonic and counter-revolutionary plan of Yankee imperialism and that of the fascist, genocidal and sellout Humala government.

Regarding the actions of the third ROL and the character of the third ROL, we reaffirm what we stated in our October 2011 document, which states:

---

[1]"The *Southern Command 2007 Report, Command Strategy*. The document was the most ambitious strategic plan that an official U.S. agency had conceived in years regarding the region. The Southern Command announced and understood its projection in the area. Its mission and vision seemed overblown, to such an extent that it claimed to be the leading organization among existing agencies to ensure 'security, stability, and prosperity throughout the Americas.'

This new Southern Command strategy reinforced the military component of U.S. international policy toward the area. For example, between 1997 and 2007, total U.S. military and police assistance to the region amounted to approximately $7.3 billion. From 2005 to 2007, four countries in the region were among the fifteen largest recipients of U.S. security assistance (Colombia, fifth; Bolivia, eighth; Peru, tenth; and Mexico, twelfth). Between 1998 and 2008, the total number of Latin American military personnel trained in the United States reached 141,430.

In this sense, the approval of the Mérida Initiative for Mexico and Central America in June 2008 and the new deployment of the 4th Fleet. As of July 1st of that year, they were shown in the context of a greater extension of U.S. military power in the region and context of an inflation of tasks assigned to the armed forces after September 11th.

In turn, the agreement forged in 2009 between Washington and Bogotá for the use of Colombian bases was part of this trend, but a more ambitious ingredient was added…the qualitative leap that the commitment between Colombia and the United States meant became evident. In essence, the agreement was presented in Bogotá as a necessary continuation of the fight against drug trafficking and terrorism, and in Washington it was presented as an indispensable replacement for the Manta base in Ecuador, which the United States was to leave in November, as locations to carry out 'contingent operations, logistics and training' and as a bridge to expand contact between the Southern Command and the recently created African Command, according to the specific language of the Pentagon documents.

But now we are witnessing a new dimension of the 'war on drugs': it serves the Southern Command to have a broader scope, and the military to continue unperturbed the strategy of U.S. primacy that was drawn at the beginning of the Post-Cold War and that has not yet been modified" (Tokatlian, Juan Gabriel (2010): The 'anti-drug war' and the Southern Command. A delicate combination. In: Foreign Affairs–Latin America, Vol. 10, N° 1. Buenos Aires: Universidad Di Tella).

It is necessary to accurately see what the ROL of José and his cronies puts forward to be able to demolish and sweep away all the convergences with this ROL. Its content is feudal-imperialist, it is against the Great Leadership of Chairman Gonzalo, it is against Marxism-Leninism-Maoism, Gonzalo Thought, it is against the Party and against the People's War. They aspire to bring forward the four changes: change in leadership, denying that the center of party unification is our Great Leadership; putting forward the Central Committee as a supposed center of party unification, negating what was put forward in the First Congress about the role of Chairman Gonzalo, instead of a proletarian leadership they try to impose a leadership of warlords; change in line, negating the General Political Line and its center, the proletarian Military Line. They want to impose their revisionist "new program" and their bourgeoisie military line, negating the Communist Party of Peru as a Marxist-Leninist-Maoist, Gonzalo Thought, militarized, Party–trying to impose their "Militarized Party" which is nothing more than a variant of the miscarriage of a "political-military organization" of the MRTA rats, and; they want to transform the people's war into a mercenary struggle in the service of the highest bidder.

We call to serve the reorganization of the Communist Party of Peru in the midst of people's war, fighting to the death against revisionism, specifically against this third ROL, revisionist and capitulationist, without neglecting the continuation of the struggle against the second ROL, because they are nothing more than two sides of the same coin, of revisionism and capitulation in service of imperialism and reaction.

And, in the face of these facts, **what position does the counter-revolutionary spokesperson take, who from the usurped page of RS spreads its sinister propaganda?**

The one that corresponds to him according to his true class nature, that of the true spokesperson of Operation Freedom carried out by Yankee imperialism and Peruvian reaction, following its call, gave him a chorus. Logically, as a two-faced element, he issued a pronouncement entitled: *Proletarians of All Countries, Unite! Reject and Condemn the Counterrevolutionary Attack of the "Left" Opportunist Line against the Class! Crush Armed Revisionism, Long Live the People's War!,* in which he presented himself as a great fighter against the revisionism and capitulationism of the "LOL," that is, the third ROL of the rat José. Against which he pointed as if it were the main enemy, and not just what he is: a revisionist and capitulationist servant of imperialism and reaction. And changing tactics, he went from inflating the second ROL and its MOVADEF (seeking to cover up the third ROL), as he had been doing until his March pamphlet, to attacking it as the main enemy, joining the government's call for "unity." In order not to take a position against the main enemy, imperialism and reaction, in order to not take a position before

the intervention of Yankee imperialism and its lackey, the government of the day. To hide the genocide that they are committing against the peasantry. In short, they aimed against the armed action of the third ROL, to throw dirt in the eyes of the people, to seek to hide the imperialist intervention and genocide against the people.

In his pronouncement, very ready and opportune for the reaction, usurping the name of the MPP, etc., among other things he says:

> The Peru People's Movement reaffirms itself in the position of our Party, the Communist Party of Peru, its Central Committee and its whole system of Party leadership, of rejecting and condemning the miserable attack of the traitors from the "left" opportunist line (LOL) against the class and the workers in Cuzco. It is an attack against our class, which clearly expresses the class position of these miserable ones and their condition as traitors against the revolution and our people. Furthermore, it is an attack that shows how the LOL serves and is part of the counter-revolutionary plan of imperialism, reaction and revisionism in Peru and on world level to spread revisionism, confusion, division and capitulation in the revolutionary ranks, aiming against Maoism with their "peace accords," amnesty, parliamentary cretinism and armed revisionism. See for example the recent news about the kidnapping in India within the context of this imperialist plan, with which they try to present all this armed revisionism as "Maoism."

And in another paragraph he adds:

> In this context we must see the actions of the LOL and of the miserable Artemio, who ended up as a **drug trafficker** with his own maceration pool.

And to try to cover up their attack on all that is revolutionary violence under the pretext of targeting "armed revisionism," they say:

> **We develop armed actions** to build the new society, building the Party, the Army and the Front in the midst of the people's war, **linking it to the heroic struggles of the people for their demands**…

But, that they carry out "armed actions" is pure babble, which he repeats at every moment to continue with the deception that he represents a "PCP," its "CC," since they do not carry out any, as can be seen in the very pages of his fraudulent "RS 37," where he cannot report any of its "armed actions," in spite of the fact that there he claims to have six "Regional Committees," but none of them are capable of reporting a single armed action. The armed actions, which appeared in previous years in *Red Sun* as "List of Actions," were made up from what appeared in the reactionary newspapers, that is,

from sources of reaction, in the absence of Party reports; since the two-faced counter-revolutionary subject, who claimed to be the representative of the Party abroad, for more than twelve years, never reported any of them. For that reason, these "Lists" presented actions of the ROL of the VRAE and actions of the ROL of Huallaga as their own actions.

Moreover, neither this subject, nor the "Committees" that he says support it, as we read in his "pronouncement," appearing in that same "RS 37," present a report of their own, partisan, of their own "mass work" and of the struggles of the masses–which they call "social conflicts" as the reaction–to which they cynically say they "listen to their heartbeat"; they only refer to these struggles, they "greet" them, following a "greeting" by their "CC," which the only thing it does is to enumerate some struggles, repeating, plagiarizing a report of the "Defense of the People" (institution of the old State established to divert the struggle of the masses towards "dialogue," saying that the genocidal State watches over their "human rights" when they violate them every day). Whoever wants to verify this should read the alleged pronouncement of the "Six Regional Committees of the PCP" ("RS Issue 37," page 3 and following), repeated in his article on the "National Situation" (page 14 and following of the aforementioned "RS," as a quote from the pronouncement of his "CC").

We suggest that they compare this "greeting" in their "documents" with the "reports on social conflicts," prior to these "internet flyers," which have never circulated in the country. But for those who don't want to put in such effort, it may be enough to look at the style in which the account of the "greeting" struggles is presented.

Contining, regarding the pronouncement of the counter-revolutionary spokesperson, to put it briefly: it confirms once again what he and his nature are: a two-faced reactionary agent, of this subject who pretends to present himself as an "envoy of the PCP": **it uses a fake denunciation against an armed action carried out by the ROL of the rat José, whom it lumps with the rat Artemio of the other ROL, to accuse them of being drug traffickers, that is to say, they are no longer revisionists and capitulationists, but mainly "drug traffickers," "kidnappers."**

Why does he do this? Because he believes that the time has come, hiding behind the struggle against the actions of "armed revisionism," to raise and try to give "legitimacy" to the hegemonic and counter-revolutionary plan of Yankee imperialism, which it is developing through its Southern Command in our country and other Latin American countries, as "war on drugs," "war on narcoterrorism," "war on insurgencies" (a concept which according to the field manual of the Yankee Armed Forces (Field Manual of the Yankee Armed Forces, 2007[2]), covers the war against "actions of organized

[2] *Field Manual 3-24 Counterinsurgency Manual 2006, Field Manual 3-07 Stability Operations (2007),* US Army Marine Corps 2007 and US Army 2008 (Abs 1-10) states: the foreign policy objective is *"a secure environment, rule of law and a sustained economy"* which can only be achieved if the military is in a position to engage in the full spectrum of conflict, between stable peace and open warfare. The focus of stabilization also refers to a preventative intervention before conflict breaks out. See what Gates,

crime," which "includes kidnappings by armed irregular groups," etc.). A hegemonic and counter-revolutionary plan which is served by the hoax of the "peace agreements," all the sinister attacks against our Great Leadership and Gonzalo Thought, as well as this sinister pronouncement.

With the pronouncement, using the "fig leaf" of the "struggle against armed revisionism," this subject openly serves to create favorable public opinion, not only to Yankee intervention in Peru and Latin America, and offers his service to try to hide the genocide it is committing, but also, he puts himself directly at the service of the current government, which is at the head of the old landlord-bureaucrat state, submitted to imperialism, mainly Yankee imperialism. Therefore, they put themselves concretely in service of the third and main task, the need of imperialism and Peruvian reaction, that of annihilating the people's war.

And Internationally, Where Does This Pronouncement That We Crush, Reject, and Condemn Point To?

It is aimed against the people's wars and the revolutionary and anti-imperialist armed struggles taking place in the world. That is why in their "RS 37," in the international section, they only focus on the other hill and not on how the new great wave of the world revolution is developing; that is why they do not highlight at any moment the development of the actions of the people's wars and the armed struggles of liberation, which daily beat imperialism and reaction in India, in Afghanistan, in Iraq, in Palestine, etc. Therefore, without any knowledge and concrete analysis of the actions carried out by the Communist Party of India (Maoist) as a part of the development of the people's war, he takes a news item from the press taken out of context to attack the comrades in India as armed revisionists, accusing them of also carrying out kidnappings and not actions of the people's war. That is to say, he accuses the Indian comrades of doing "armed revisionism," that they carry out "kidnappings," just as much as the "armed action carried out by the revisionist armies of the LOL."

Why are they proceeding in this manner? Why, just now, after having presented themselves as the personal representative of the rat José for twelve years, are they attacking him now?

In general, both in Peru and worldwide, to use their fraudulent struggle against "armed revisionism," against the "armed actions" of "revisionism" **to discredit the armed actions of the people's wars and armed struggles in Peru and the world,** that is to say, to attack in this way the principal form of struggle of the peoples of the world,

---

former U.S. secretary of defense, said in 2009: *"As much as possible, it is the need to work with and through local governments to prevent the next rebellion, conjure up the next failed state or the next humanitarian disaster."*

armed struggle, revolutionary violence, people's war, that is, to condemn the armed actions under the pretext of fighting armed revisionism, and to say that what is to be done is "mass work," mass work which is thus separated from the people's war. This is nothing more than a call to fall in line with the "mobilizations of the masses" led by all kinds of revisionist and reactionary leaders.

Therefore, let's now cover again something else from their "RS 37," in it, following the style of their "party" documents with the same purpose, they publish a map of a monthly report of the "Defense of the People," published in the newspaper "La República," and so that there is no doubt as to what their ideological dynamic is, they, in the same article on the "national situation," under the quote of the supposed pronouncement of the "CC of the PCP," that is, their own "CC," they say:

> The current situation in Peru is marked by the sharpening of the class struggle, whose symptoms are, mainly, the development of the people's war led by the Communist Party of Peru and the **social conflicts that run throughout the national territory** (among others Ancash, Lima, Cajamarca, Piura, Junín, Huancavelica, Ayacucho, Madre de Dios, where, **in clashes with the police there have been 3 dead and 36 wounded) in defense of mining and natural resources** [see map in the infographics of the newspaper "La República" 3/15/2012]. Quote that we break down a little further on.

Who are these "authorities" who could not be more brazen? They are nothing more than the puny representatives of the regional power of the old State. As a reactionary agent, they have to appear more brazen and devious than the revisionists Avakian and Prachanda, who are being targeted to cover up their real role in the class struggle.

Contrary to what this snake who usurps the name of the PCP says, the claim that they carry out "armed actions" is pure babble, which he repeats at every moment to continue the lie that he represents "armed actions," "mass work," etc., it is very clear that the organization he truly represents is a false reactionary construction; as can be seen from everything that comes out of his own jaws, from what is written and what is not, in the pages of his fraudulent "RS 37"; and moreover, they cannot show a single material proof of its real existence: such as leaflets, photos, reports of party meetings of any level whatsoever, and this has been the case for over twelve years.

Therefore, the "Lists of Actions" in the issues prior to the fraudulent "RS 36," were mostly a mixture of actions done by the VRAE ROL and the Huallaga ROL, presented as their own actions in the "Lists of Actions" of the RS issue prior to the fraudulent issues "36" and "37"–"lists" fabricated abroad as we have already pointed out above.

Now he is saying, to continue his deception, that José's "LOL" has only been structured a year ago, when at the beginning of June 2009, he took a position on the interview granted by the rat José to Peruvian TV, in which, José personally pointed out that

since July 1999, he and his brood had broken with Chairman Gonzalo and his Central Committee, whom he insulted as "revisionist," "traitorous," "terrorist," etc.[3] Moreover, this two-faced counter-revolutionary subject, in March 2011, made propaganda for that interview, showing parts of it as if they represent the PCP (in an event organized in Sweden for the occasion of March 8th). Furthermore, whoever wants to see the course of the revisionist and capitulationist ROL of the rat José and its structure, can do so by visiting their website where there is documentation going back to 2006.

The Spokesperson of Reaction Serves the Plan of Imperialism and Reaction

Well, we have already seen that this reactionary spokesperson has nothing to say about people's war; and neither does he have anything to say about the struggle of the masses in and for the people's war. That is to say, he has nothing left-wing, it's all smoke and mirrors; he couldn't possibly be more phony. Not only that, but in trying to document his deception, he only succeeds in drowning himself in his own lies.

Additionally, his deceptions are exposed at every step, because this subject has nothing in common with our position and conception. Therefore, it is necessary to repudiate the above quote, in which he wants to equate "people's war" with "social conflicts," as "symptoms of the class struggle sharpening." Everyone knows that the terminology of "social conflicts" is used by reactionary sociology. It does not correspond to historical materialism, but rather to reactionary sociology that preaches the possibility of social peace, that with dialogue social conflicts can be solved, because there are no antagonistic and irreconcilable class interests between the exploited and the exploiters, between the oppressed and the oppressors, i.e. class struggle, whose highest development is people's war. This is not a simple symptom, but the historical development, the development of the class struggle has brought us this far, as Chairman Gonzalo tells us.

Therefore, this reactionary spokesperson cannot confuse anyone with his charade, because the development of the class struggle has led us to its highest form, people's war, with this being the principal form of class struggle of the proletariat and the people in our country, with the army as its principal form of organization. It is by developing the people's war through actions, through the People's Liberation Army, that the Communist Party of Peru carries out mass work, uniting the struggles of the masses for their immediate demands to the struggle for power through the people's war. In this way the mobilization of the masses is elevated to higher levels.

To say that the "people's war… and the social conflicts" are "symptoms of the class struggle of the present situation sharpening," as is written in this fraudulent "RS 37," is nothing other than an attempt to reduce the people's war to a factor or conjunctural

[3]The footage can be seen here: https://youtu.be/QsiNv3CTVUY, timestamp 12:41.

symptom, nothing more than a reactionary failure; while for these failures, another symptom would be the "social conflicts." Which, according to the definition of reaction, of the "Defense of the People," include "conflicts" of various types, ranging from disputes between authorities at "local, regional and national levels," "environmental conflicts," "electoral claims." In doing so, he is complying with a reactionary mandate, that is, with the task of the "Defense of the People" to publicize the existence of these "conflicts" *"…as a warning signal addressed to the State, the companies, the leaders of the social organizations, the media and society in general so that decisions are taken to conduct the conflict by means of law and dialogue and to avoid violent outcomes."* (*What is the report on social conflicts?,* Defense of the People of Peru, can be read in each report).

Then, this "symptom" corresponds with "dialogue" and "accords for its peaceful solution." And, according to them, considering the "people's war" as a symptom, what would correspond, according to the logic of the "solution of conflicts"? Following the thread of this reactionary hoax, we arrive at what they do not dare to say, the "peace accords" (the "P.A.," imperialism's plan).

Below the commented quote, they write: "On the hill of the people, great struggles take place where the role of the Communist Party of Peru cannot be denied" ("RS 37," p. 15). With which they put on the table that in spite of their efforts to deceive, they are not in favor of merging the struggle of the masses with the people's war. Rather they speak of "great struggles" within which are not the actions of the people's war, so what they have in their heads, what they are propagandizing is the "people's war" of those of the "Peace Accord," with their "political war," "without bloodshed." As has always been openly maintained by the faithful accomplice of this reactionary subject–the element who works as the technician of the usurped web page and who is the only one who pays attention to him in the country where our main base was abroad–and who on various occasions has repeated that the "people's war is political war," to say also that he "does not want a people's war in his own country."

This same false "representative of the PCP" and the reactionary, who from Peru or from abroad, acting as "contact," in June 2003, wrote a directive in the name of his "C.C.," in which they raised a similar action to that of April 9th in La Convención, against which today they have torn their clothes–that of the Techint–of the third ROL. Surprising? For us: No! It only confirms that he has never represented the Party, but has always acted as an agent of reaction. We denounce this counter-revolutionary action of supplanting the contact of the Party with its generated organization for party work abroad, the MPP. This action is aimed at preventing the general reorganization of the PCP, to annihilate it and annihilate the people's war, to liquidate the MPP and serve the liquidation of the RIM, in convergent action with that of Avakian and Prachandra, to attack the Communist Parties and revolutionary organizations of the ICM and to seek to discredit the people's war and armed struggles for national liberation.

In this way, what is real and concrete is that this spokesperson of reaction serves the plan of imperialism and reaction in Peru and at the international level, in this plane, when he attacks the people's war in India, filling it with counter-revolutionary accusations, thus concretizing what he understands as the task of his "MPP" agreed upon by his "C.C.," that is:

> "**the Peru People's Movement firmly assumes its role of serving the ideological struggle** against revisionism at the world level" (our emphasis).

Their "ideological struggle" is to attack the Maoists who carry out people's war in India, who are the main danger for the reaction of India and Yankee imperialism in South Asia, as "armed revisionists," to deny everything that is people's war in the world, through erasing the class line that separates people's war, that is, the military line of the proletariat, from the bourgeois military line applied by revisionism. What for? To sow capitulation and demoralization in Peru and abroad, to preach their "work of the masses," that is to say their "accumulation of forces," that is to say to serve the bureaucratic road, the old road of elections and parliamentary cretinism.

In the case of India, this mammoth is at the service of world counter-revolution as well as the hegemonic plan and world counter-revolutionary gendarme of Yankee imperialism, because he serves to create public opinion favorable to the military action of reaction and imperialism's, mainly Yankee imperialism's, armed counter-revolution in India.

Case in Point: Ju Feng

In the Chinese Revolution there was a very similar case, that of a two-faced counter-revolutionary, Ju Feng and his followers, who like this false "representative of the Party," whom we will from now on call the native Hu, were true spokesmen for all counter-revolutionary classes, groups, and individuals. Thus, at present, like this two-faced subject.

As a good emulator of the Ju Feng elements, he upholds "fighting against the armed revisionism of the LOL" to made a derogatory expression for the actions of the people's war led by the Communist Party, just as when speaking of "revisionism" they make a derogatory expression for "Maoism"; exactly as the Ju Feng elements in the past spoke of "veiled feudal forces," "a derogatory expression for **'the people's democratic dictatorship led by the proletariat and the Communist Party and based on the worker-peasant alliance,'** just as the word 'mechanism' used by this clique is a derogatory term for 'dialectical materialism.'"[4]

Many will say: "how could this happen?" As Chairman Mao teaches us:

---

[4] *Preface and Editor's Notes to Material on the Counter-Revolutionary Ju Feng Clique*, May and June 1955, Chairman Mao, Volume V, Selected Works.

> How do counter-revolutionaries employ their double-dealing tactics? How do they succeed in deceiving us by their false appearances, while furtively doing the things we least expect? All this is a blank to thousands upon thousands of well-intentioned people. On this account, many counter-revolutionaries have wormed their way into our ranks. The eyes of our people are not keen, they are not adept at distinguishing good people from bad types. When people operate in normal conditions, we know how to tell the bad from the good, but we are not adept at seeing through those who operate in unusual conditions. The Ju Feng elements are counter-revolutionaries who put on a disguise to hide their true features and to give a false impression. But since they oppose the revolution, it is impossible for them to cover up their true features entirely.[5]

As we have seen in this case, as always, this *native Ju* uses:

> Sure enough, Ju Feng subsequently acted on Lu Tien's suggestion to use offensive tactics for defence. Thus he came to Peking to ask for a job, requested that his case be discussed, submitted the 300,000-word memo to the Central Committee, and finally seized upon the question of the Literary Gazette to open fire… Generally, when things are going badly for them, all kinds of representatives of the exploiting classes use offensive tactics as a means of defence in order to survive today and grow tomorrow. Rumours are fabricated out of thin air and lies told point-blank; certain superficial phenomena are seized on for attacking the essence of things ; some people are lauded while others are condemned; and matters are distorted and exaggerated to "make a breakthrough at certain points" so as to put us in a difficult position. In short, they are assiduous in studying what tactics to use against us and "spying out the land" in order to attain their end. Sometimes they "play possum" and wait for a chance to "spring a counter-attack." They have long years of experience in class struggle and are skilful in different forms of struggle, legal and illegal. We revolutionaries must know their tricks and study their tactics in order to defeat them. Never be so bookish and naive as to treat complex class struggle as a simple matter.[6]

To Annihilate the People's War Is a Necessity of Imperialism and Reaction

So, now let us proceed with the disemboweling of his mammoth tome, "AGAINST WIND AND TIDE…," by showing all his counter-revolutionary evil distilled and condensed in the quotation at hand. Beginning by establishing: what is the meaning of

[5] *Ibid.*
[6] *Ibid.*

all the filthy words in the quote which he tries use to paint all his counter-revolutionary action in red?

Internationally we have already seen that he is aiming against the new wave of world revolution, venting all his hatred against the people's war in India and opposes the armed national liberation struggles developing in the backward countries against the imperialist war of aggression and therefore aligns himself with the plan of imperialism. That is the real class character of his misleading call for "ideological struggle… against revisionism."

Nationally, it is inscribed in the current campaign of psychological warfare of imperialism and Peruvian reaction, with the collaboration of its revisionist spawn of the right opportunist line (ROL) of the second ROL (Miriam, Morote, Pantoja, Cox, Nancy, Roldán), or of the third ROL (that is to say, the right opportunist line of José, Alipio, Raúl), as a part of the counter-revolutionary war directed by Yankee imperialism as "low intensity warfare." This is the current campaign, which the surrender of the miserable traitor "Artemio" is an important part of. The campaign that calls for "the terrorist remnants" to lay down their arms, surrender, and "renounce Gonzalo Thought and violence" (revolutionary violence).

What is the Peruvian reaction led by the CIA and headed by the present Humala government pursuing? It seeks to annihilate the people's war, to fulfill its third reactionary task that the present government has assumed; a task that today takes the form of preventing the Communist Party of Peru, in the midst of the people's war, from fulfilling the pressing and overdue task of its general reorganization. That is to say, the reaction seeks to prevent the Party from solving the problem of its leadership in order to carry the revolution through to the end.

This filthy appeal responds, then, to that renewed reactionary campaign that they are pushing forward with the surrender of the miserable Huallaga traitor, Artemio, in which they all participate: the American Central Intelligence Agency (CIA), the government of the fascist, genocidal, and sellout Ollanta Humala, the Catholic Church, the Armed Forces and Police Forces, Antauro Humala, the ROL with Miriam, Morote, etc. and its MODAVEF with the rats Crespo and Fajardo, and, as it could not be otherwise, the rats of the ROL headed by José and others who have usurped the Main Regional Committee of the Party and have been setting up since the end of the last century their "new leadership"–mainly in the zone known as VRAE of the sierra and brow of the jungle of the Main Committee,–their new "First militarized Central Committee" (to which this miserable agent claimed to represent abroad, gave his full and unconditional submission to and to whom he always transmitted to the MPP: "the salutations of comrade José, responsible for the CC of the Party"). On this, it is enough to contrast the history from 1999 to date: before our October 2011 denunciation, this wretch tries to pretend that they were applying two-line struggle against the ROL of the VRAE, that is why he gave "his full and unconditional subjection" to these rats.

Who are they trying to deceive with these explanations? The truth already came out and unfortunately everyone knows that in July 1999, José and his gang, in collusion with the rat Julio from Huallaga, handed over the Party leadership to the enemy. It was not only Raúl, but also José himself as well as Alipio and others. So, the explanation by this counter-revolutionary, about his so-called "two-line struggle," which he claims to have developed with these rats, is nothing more than another illegitimate trafficking. He is against the most elementary two-line struggle in the Party.

Firmly Assume the Defense of the Basis of Party Unity!

Let us go to the main thing: let's firmly take up the defense of Chairman Gonzalo and Gonzalo Thought, the Basis of Party Unity (BPU), and the party experience of more than 31 years of development of our invincible people's war to oppose this *native Ju* who calls for capitulation in Peru and abroad. Let us contrast him with the class truth that is written with the blood of communists and masses, where it is recorded that with the actions of the guerrilla war the people's war is initiated and developed, that with it the concentric construction of the three instruments is made, with it the new Power is seized, defended, and developed, and the masses are incorporated into the people's war by leaps and, therefore, mass work can never be opposed to people's war, nor less postpone people's war or "diminish" people's war with the pretext that first "we must do mass work."

We reaffirm what was established by the Congress:

> The most substantive and developed part of Gonzalo Thought is found in the Party's general political line; this thought directly sustains, therefore, the line and its five elements, with the point of departure being how it understands and maintains the Program firmly on course.[7]

Therefore, it is necessary to refer to the party documentation, so that everyone knows how to differentiate, that is, can understand what is the Marxist-Leninist-Maoist, Gonzalo Thought line, and what is the revisionist line and reaction's plan.

> **The beginnings were modest, almost without modern weapons. It was fought, it was advanced and it was built from the small to the large and from the weak material and initial fire came the great turbulent fire and mighty roar that grows, sowing revolution and exploding into ever more impetuous People's War.**

[7] *Fundamental Documents*, Central Committee, Communist Party of Peru, 1988.

This third milestone lasted from May to December of 1980, resolving the problem of how to initiate the armed struggle, of going from the times of peace to the times of war. In this context, the militarization of the Party through actions and the masterful Plan of Initiation were key. This was how the new was born: the principal form of struggle, the armed struggle and the principal form of organization, the detachments and squads. The most outstanding actions in the field were the guerrilla actions of Ayrabamba and Aysarca and, in the city, setting fire to the Municipal Building of San Martín. The boycott of the elections by the people of Chuschi was the action that initiated the beginning of the People's War. This plan was fulfilled, defeating the Rightist positions that were saying that the Plan was "Hoxhaite" and that the actions were centered in the city. Their arguments confused appearances with reality and distorted the essence of the struggle, since reactionary propaganda gave big headlines to the sabotages in the cities and minimized the actions in the countryside. *It is a characteristic of the People's War in Peru to make the countryside the principal theater of action and the cities a necessary complement.*

(…)

Chairman Mao established the road of encircling the cities from the countryside. At its heart are the base areas, taking into account that the powerful imperialists and their reactionary Chinese allies were entrenched in the main cities. If the revolution refused to capitulate and wanted to persevere in the struggle it had to convert the backwards rural zones into advanced and solid base areas, into great military, political, economic, and cultural bastions of the revolution to fight against the fierce enemy that was assaulting the rural zones using the cities, and to carry the revolution step by step to a complete victory through a protracted war.

(…)

True to this basic Maoist thesis, Chairman Gonzalo has established the carrying forward of a unified People's War where the countryside is the principal theater of armed actions: Since in our country we have an immense majority of peasant masses, that is where we must build the base areas… Going further, Chairman Gonzalo specifies that in the cities armed actions should be carried forward as a complement, since international experience, as well as our own, demonstrates that this is feasible.

(…)

The base areas are the strategic bases which the guerrilla forces rely on to fulfil their strategic tasks and to achieve the objective of preserving and increasing their forces as well as annihilating and throwing back the enemy.

Without such strategic bases there would not be anything from which to carry out any one of our strategic tasks to reach the war's objective.

Chairman Mao outlines three reasons for the creation of base areas: To have armed forces, to defeat the enemy and to mobilize the masses. These were specified in our People's War in 1982, when applying the Plan of Deployment the guerrilla war in its role of beating the enemy, we aimed at destroying the old feudal relations of production. Police posts were assaulted, selective annihilation of landlord power was applied, and the police forces abandoned the countryside and were regrouped in the provincial capitals. The authorities of the old Power massively resigned which created a power vacuum, while tens of thousands were mobilized. It is in these conditions that the base areas emerged and were specified in the clandestine People's Committees. Therefore, it is wrong to take the Chinese experience dogmatically since if the conditions were given and principles were in effect, we would have had sufficient reason to build the base areas. To agree with this thesis implied a struggle against Rightism that was arguing that we had not defeated large enemy forces, when the problem was that the enemy forces had abandoned the field as a consequence of the rout of their political and military plans. Chairman Gonzalo has established *a system of base areas* **surrounded by guerrilla zones, zones of operations and points of action taking into account the political and social conditions, the history of struggle, the geographical characteristics and the development of the Party, the Army and of the masses.**

It is fundamental to support the validity of the road of encircling the cities from the countryside and its heart, the base areas, **because with only wandering guerrillas of insurrection the People's Guerrilla Army would not have the Base Areas as a rearguard that sustains it and neither would the new Power be built.** *We are totally against focoism.*

(…)

Chairman Gonzalo teaches us that the People's War is protracted, long, and bloody but victorious and tells us that the time of its duration will be extended or shortened within the scope of its protracted character. The time will depend on the extent that we fight within the proletarian military line, since rightism is the principal danger that can cause serious setbacks to the war.

(…)

Since 1983, the political strategy of the Great Plan of Seizing Bases was completed through two campaigns of defending, developing and building Parts I and II, and of the Plan for the Great Leap with its four campaigns up to December 1986. These plans show us the advance of the People's

War, that we are solidly linked to the masses, against everything they say, since the facts are undeniable. The People's War has seized an area that is being extended through the Sierra, the Jungle, and the Coast, marching vigorously and strong, building what is new and opening the future. The Base Areas which are the foundation of the road of encircling the cities from the countryside have been already established.

All the above quotations are excerpts from the Military Line of the PCP, the center of the General Political Line of the Party, sanctioned by the First Congress in 1988.

Don't let them tell us stories, **"Campaigns of 'encirclement and suppression' and the counter-campaigns, principal form of the People's War. It is a law that the counter-revolution in seeking to crush the revolution unleashes campaigns of 'encirclement and suppression' against each unit of the People's Guerrilla Army or against the Base Areas. The operations of the People's Guerrilla Army adopt the form of counter-campaigns and Chairman Mao has established nine steps to crush a campaign of 'encirclement and suppression.'"**[8]

The plan of reaction is to make us fall into the trap of counterposing "mass work" against people's war, this is the purpose of all the nonsense published on the usurped page "RS." Let's see some excerpts from the Mass Line of the Party to unmask this plan:

We should organize the masses with arms in hand because they clamor to organize the rebellion. As such, we must apply the People's War which is the principal form of struggle and organize them for the taking of Power led by the Party.

(…)

He differentiates from those positions that today are based on "the accumulation of forces," which propose parsimoniously binding the masses by way of the so-called "democratic spaces" or the use of legality. Such accumulation of forces doesn't correspond to the current moment of the international and national class struggle, it doesn't fit in the type of democratic revolution we are developing and which will have other characteristics within the socialist revolution, since we are living in a revolutionary situation of unequal development in the world. He is opposed to and condemns the opportunist positions of making the masses tail after the big bourgeoisie, an electoral path or for armed actions under the command of a superpower or power.

(…)

[8] *Ibid.*

Organize the masses so that they can go beyond what is permitted by the existing legal order, so that they struggle to destroy the old order and not to maintain it. This is accomplished by use of the three instruments of the revolution: The Party where the few converge, the Army with more participants, and new State–Front which is the base which progressively aglutinates the masses through leaps. In the countryside this is achieved through People's Committees and in the cities through the People's Revolutionary Defense Movement. In this way the tradition of electoral fronts, which the revisionists and opportunists apply to channel the struggle of the peasantry and to divert the masses in the cities from not seizing Power through war, is destroyed.

To center on political Power also demands the organization of the masses in diverse new forms of struggle, because war imposes changes on the struggle and organization of the masses.

Who are they trying to confuse? Well, we have a principal form of struggle, people's war, and a principal form of organization, the Army, and the work of the masses is carried out through the army, all this is developed through the military plans of the people's war which are embodied in campaigns and armed actions, which generates great mobilization of the masses, which then must be incorporated into the Party, the Army, and the Front/New Power. The people's war is carried out throughout the width and length of our geography, without excluding any geographical region–and not as this infiltrator says "but not in the jungle." As we read in the quotations from our Military Line, actions are carried out not only in the countryside, but also in the city.

For this reason, we set fire to everything that this *native Ju* repeatedly says, it is pure reactionary humbug. Faced with it, what corresponds is to denounce it, to smash this reactionary hoax that uses the name of the Party, its generated organization and the *Red Sun* magazine to serve the plan of reaction to prevent the general reorganization of the Party, to liquidate the MPP, and to use the prestige of the Party and the people's war, to oppose and stifle the struggle of the Communist Parties and revolutionary Organizations to advance in the process of coordination to crush and overcome the situation in which RIM finds itself due to the nefarious action of the new revisionism converging with the action of imperialism and Peruvian reaction. Opposing the efforts of the communist parties and revolutionary organizations, using as a battle flag, the black reactionary banner of opposing a people's war against another people's war: as when this subject says that *"to support the people's war in India is to isolate the people's war in Peru."*

Against all this reactionary hoax what is to be done is to continue the task of the general reorganization of the PCP in the midst of the people's war to carry it forward victoriously until the seizure of power in the whole country and complete the democratic revolution, under the leadership of Chairman Gonzalo and Gonzalo Thought,

which is the center of party unification and the guarantee of triumph that leads us to communism. To us in particular to continue with the building in all levels, today centering on the reorganization of the MPP, fulfilling our three established tasks and the two campaigns, mainly the defense of our Great Leadership as the key rope that allows us to pull everything.

Reaction, through this mammoth of a thing, tries to call on us to not fulfill our established tasks to serve the people's war, to not continue developing the plans and campaigns of the Party in Peru and abroad. Because his plan and his campaign aim at spreading revisionism and capitulation, that is also what corresponds to reaction and imperialism. They are the ones who have always promoted and engendered revisionism and treason, applying the principle that strength is seized from within. That is why this wretch cannot present on behalf of his "MPP" and his "CC" any Marxist-Leninist-Maoist, Gonzalo Thought plan and campaign, he cannot present any party assessment, much less of the two-line struggle that now after 12 years they say they have developed with their "responsible José," that is why they cannot even characterize the current government, nor its reactionary tasks, that is to say, no political foundation of the party situation, of the national and international situation. That is to say, no political foundation, nothing about the two-line struggle and the class struggle in the country and in the world, but only "brushstrokes" about it that any "light leftist" could say. He only repeats the same thing for twelve years about "mass work" and "actions," but nobody believes that story anymore, no matter how much he–like the rat José–tries to present them as "Maoism" with quotations that are distorted to try to justify the unjustifiable from the Marxist-Leninist-Maoist, Gonzalo Thought, principally Gonzalo Thought position, point of view, and conception.

For us, the ideological struggle is inseparable from the political struggle and the concentric construction of the three instruments. The mass work is a part of the concentric construction of the three instruments of the revolution and the militarization of the Party in the midst of people's war, that is, the mass work is within and for the people's war and is done through the Army.

We recall the great principle of building: on the basis of the ideological and political, simultaneously build the organizational in the midst of class struggle and the two-line struggle, all within and in service of the people's war for the seizure of power. In the 2011 document we put forward:

> **The seriousness of the situation in the two line struggle has led to a situation where organizational problems have become absolutely subordinate, the main thing at this point in the struggle must be the ideological, because what is at stake is the color of the Party as a whole. Without unity of understanding, without unity in ideology, there is no basis for party unity.**

It is more necessary than ever to grasp Gonzalo Thought to solve new problems.

But that is something fundamentally different, to separate the ideological struggle from the political struggle, from the problem of Power for the class, because for our ideology to show all its transforming power it has to be applied to a reality, to a concrete situation, to the Peruvian revolution; in our case, to solve the problems faced by the Party and the revolution; And that is politics. As Chairman Gonzalo tells us, the masses need politics, because only with it can we respond to their needs, if it is not applied– as Chairman Gonzalo tells us–it can only shine but it does not serve as the almighty weapon that it is, the most powerful weapon in the world in the hands of the proletariat and the people. It is with it that they will solve their main historical need, to make the revolution.

What Are the Sinister Intentions behind This Call to Only *"Develop Ideological Struggle"*?

Logically they aim at capitulation through telling us that abroad "that is enough line," that is a rotten revisionist line of reactionary character. What they seek is to depoliticize our ideology so that it serves reaction and imperialism's plan: to separate ideology from politics, pretending that it is not put into practice, that abroad the established tasks are fulfilled and that in Peru only "mass work" is done, repeating the old revisionist nonsense of more than 80 years of "accumulation of forces"; this is what the wretch has been propagating here through his "directives" for twelve years.

We reject this reactionary monstrosity that says that what is to be done here is to carry out "ideological struggle" simply, because for us it is strictly linked to the political struggle and to the building in the midst of the people's war, to serve its development and triumph. Ideology cannot operate independently, class is strictly political, because it is thought and transforming action.

With this monstrosity that calls for only "ideological struggle," the intention is to remove all practical sense from the ideological struggle, which for us is centered on the defense of Chairman Gonzalo's Great Leadership.

This reactionary plan is embodied in concrete, as always, on the grounds of "new circumstances"; however it is presented, in essence it is: *"there are no conditions to continue the people's war."* According to this reactionary plan, it is only necessary to carry out some actions (to deceive the unwary, but even so they do not even speak of any concrete actions, because "their CC" is nothing more than a reactionary figment) and to focus on "mass work." Perfect! That is, the ROL of José that reaction promotes.

Look at the development of this ROL for more than twelve years: they usurp a Party Committee and focus on one zone and only carry out actions to maintain themselves and do "mass work" to defend fiefdoms, but without building the country-wide seizure

of power, because they are not for the revolution, for power for the class, for the Party, but instead are for personal power.

That is why the agent who has usurped RS tries to portray himself as a defender of the Great Leadership and Gonzalo Thought, but in the exact style of the rat José, who says "as in China," "as Chairman Mao says," trying to pose as a Maoist, to oppose Chairman Mao against Chairman Mao by denying Gonzalo Thought, which is the creative application of Marxism-Leninism-Maoism.

It is therefore a "Marxism of listeners," of "hearsay," as corresponds to its reactionary nature. Since the end of the last century he has been transmitting the directives of the rat José and his fiefdom as directives of the Central Committee, intermingled in recent years with Cuba-ist and Red Homeland positions, interspersed with what they find on Internet blogs, what the snitches of reaction find in their prison eavesdropping, and the documentation that has fallen into the hands of reaction.

That is why in all their documents–no matter how much they write our cheers and slogans–, in all their content, they only express positions that go against Marxism-Leninism-Maoism, Gonzalo Thought.

As we have already pointed out above, the plan of reaction has been to use RS to give cover to the capture of José from the Party Committees, one after another. Because of this, eclectic positions have been being published in RS, taking a leap starting in 2005, which come from the "new leadership of the Party"–which is none other than José himself. The call for a "new congress" is framed within these and it was the left of the apparatus abroad that imposed that nothing be published on the matter–without failing to stress that a new congress is only possible on the basis of the BPU sanctioned by the First Congress.

Celebrate the 20th Anniversary of Chairman Gonzalo's Speech that Shines Victorious and Vigorous Before the World as a Weapon of Combat!

In the present document we have demonstrated, contrasting the black position of the counter-revolutionary agent that has usurped the name of the Party, the MPP, and RS with the Marxist-Leninist-Maoist, Gonzalo Thought position of our Party. For this reason we had to resort to long quotations. Lenin taught us that complicated issues must be re-studied several times to understand them well and to be able to firmly take the just and correct position and defend it under all circumstances. Therefore, the comrades and companions need to re-study the October 2011 document and this one; in this case there has been so much confusion due to the disinformation by the enemy, so much impact from their psychological warfare. We must take a firm stand for our leadership, our ideology, our BPU, our Party, and the people's war and smash the reactionary plan. An indispensable part of this is to develop our revolutionary practice

with new forms, as part of and in service of the people's war. We call on all comrades and companions to celebrate, next May 1st, the day of the international proletariat, and, on May 17th (anniversary of IAS80) with actions that serve to develop the two united campaigns. Additionally, we call on all the forces that were mobilized by the campaign to defend the life of Chairman Gonzalo, as well as the new forces that have emerged and those who are for communism, to celebrate the 20th anniversary of Chairman Gonzalo's Speech that shines victorious and vigorous before the world as a weapon of combat. We are already coordinating with different Parties and organizations in the International Communist Movement; we want it to be a conscious celebration of Chairman Gonzalo's role as a continuator of Marx, Lenin, and Chairman Mao.

In Peru and abroad, the process of reorganization of the PCP is advancing with sure steps. We know that it is only possible to accomplish the task properly with more people's war: **"…today more than ever, we Communists and revolutionaries, the proletariat and the people, need to forge ourselves in: 'Yes, we are advocates of the omnipotence of revolutionary war; that is good, not bad, it is Marxist.'; which means adhering to the invincibility of people's war."** (*Fundamental Documents*, Central Committee, Communist Party of Peru, 1988)

Long live Chairman Gonzalo!

Long live Marxism-Leninism-Maoism, Gonzalo Thought, principally Gonzalo Thought!

Take up Gonzalo Thought to solve new problems!

For the general reorganization of the Party!

Long live the invincible people's war!
